

Package ‘oecdoda’

July 25, 2025

Title Seamless Access to OECD Official Development Assistance (ODA) Data

Version 0.1.0

Description Access and Analyze Official Development Assistance (ODA) data using the OECD API <https://gitlab.algobank.oecd.org/public-documentation/dotstat-migration/-/raw/main/OECD_Data_API_documentation.pdf>. ODA data includes sovereign-level aid data such as key aggregates (DAC1), geographical distributions (DAC2A), project-level data (CRS), and multilateral contributions (Multisystem).

oda_get_crs*Get OECD Creditor Reporting System (CRS) data***Description**

Retrieves data from the OECD CRS dataset using specified filters, years, and optional pre-processing.

Usage

```
oda_get_crs(
  start_year = NULL,
  end_year = NULL,
  filters = NULL,
  pre_process = TRUE,
  as_grant_equivalent = FALSE
)
```

Arguments

<code>start_year</code>	Integer. The starting year of the data query. If <code>NULL</code> , no lower bound is set. Defaults to <code>NULL</code> .
<code>end_year</code>	Integer. The ending year of the data query. If <code>NULL</code> , no upper bound is set. Defaults to <code>NULL</code> .
<code>filters</code>	List. A named list of filters to apply (e.g., donor codes, easure, flow type, unit measure, price base). Values must match OECD dotstat codes.
<code>pre_process</code>	Logical. Whether to clean and rename columns into a standard format. If <code>FALSE</code> , returns raw output. Defaults to <code>TRUE</code> .
<code>as_grant_equivalent</code>	Logical. Whether the 'flows' or 'grant equivalent' version of the CRS should be returned.

Value

A data frame containing OECD CRS data

Examples

```
oda_get_crs(
  start_year = 2018,
  end_year = 2022,
  filters = list(
```

```
donor = c("AUT", "FRA", "USA"),
recipient = "BIH",
measure = 100,
channel = 60000,
price_base = "Q"
)
)
```

oda_get_dac1*Get OECD DAC1 Official Development Assistance (ODA) data*

Description

Retrieves data from the OECD DAC1 dataset using specified filters, years, and optional pre-processing.

Usage

```
oda_get_dac1(
  start_year = NULL,
  end_year = NULL,
  filters = NULL,
  pre_process = TRUE
)
```

Arguments

start_year	Integer. The starting year of the data query. If NULL, no lower bound is set. Defaults to NULL.
end_year	Integer. The ending year of the data query. If NULL, no upper bound is set. Defaults to NULL.
filters	List. A named list of filters to apply (e.g., donor codes, easure, flow type, unit measure, price base). Values must match OECD dotstat codes.
pre_process	Logical. Whether to clean and rename columns into a standard format. If FALSE, returns raw output. Defaults to TRUE.

Value

A data frame containing OECD DAC1 data

Examples

```
oda_get_dac1(
  start_year = 2018,
  end_year = 2022,
  filters = list(
```

```

donor = c("FRA", "USA"),
measure = 11017,
flow_type = 1160,
unit_measure = "XDC",
price_base = "V"
)
)

```

oda_get_dac2a*Get OECD DAC2A Official Development Assistance (ODA) data***Description**

Retrieves data from the OECD DAC2A dataset using specified filters, years, and optional pre-processing.

Usage

```

oda_get_dac2a(
  start_year = NULL,
  end_year = NULL,
  filters = NULL,
  pre_process = TRUE
)

```

Arguments

<code>start_year</code>	Integer. The starting year of the data query. If <code>NULL</code> , no lower bound is set. Defaults to <code>NULL</code> .
<code>end_year</code>	Integer. The ending year of the data query. If <code>NULL</code> , no upper bound is set. Defaults to <code>NULL</code> .
<code>filters</code>	List. A named list of filters to apply (e.g., donor codes, easure, flow type, unit measure, price base). Values must match OECD dotstat codes.
<code>pre_process</code>	Logical. Whether to clean and rename columns into a standard format. If <code>FALSE</code> , returns raw output. Defaults to <code>TRUE</code> .

Value

A data frame containing OECD DAC2A data

Examples

```
oda_get_dac2a(  
  start_year = 2018,  
  end_year = 2022,  
  filters = list(  
    donor = "GBR",  
    recipient = c("GTM", "CHN"),  
    measure = 106,  
    price_base = "Q"  
)  
)
```

oda_get_multisystem *Get OECD Members Total Use of the Multilateral System (Multisystem)*

Description

Retrieves data from the OECD Multisystem dataset using specified filters, years, and optional pre-processing.

Usage

```
oda_get_multisystem(  
  start_year = NULL,  
  end_year = NULL,  
  filters = NULL,  
  pre_process = TRUE  
)
```

Arguments

start_year	Integer. The starting year of the data query. If NULL, no lower bound is set. Defaults to NULL.
end_year	Integer. The ending year of the data query. If NULL, no upper bound is set. Defaults to NULL.
filters	List. A named list of filters to apply (e.g., donor codes, easure, flow type, unit measure, price base). Values must match OECD dotstat codes.
pre_process	Logical. Whether to clean and rename columns into a standard format. If FALSE, returns raw output. Defaults to TRUE.

Value

A data frame containing OECD Multisystem data

Examples

```
oda_get_multisystem(
  start_year = 2018,
  end_year = 2022,
  filters = list(
    donor = "DAC",
    recipient = "DPGC",
    sector = 1000,
    measure = 10
  )
)
```

oda_list_filters *List Available Filters for an ODA Resource*

Description

List Available Filters for an ODA Resource

Usage

```
oda_list_filters(resource = NULL)
```

Arguments

resource	A character string identifying the resource (e.g., "DSD CRS@DF CRS").
----------	---

Value

A character vector of available filter names for the given resource.

Examples

```
oda_list_filters()
oda_list_filters("DSD_DAC2@DF_DAC2A")
```
